

CLINICAL DATA – SQUALENE (OLIVE DERIVED)

Benefits of Pure Squalene (Olive Derived)

Because it is part of our skin's natural lubrication, we know that Squalene (olive derived) has a moisturising effect on the skin. Tests have also shown that the ingredient not only provides hydration, but it can also help reduce the appearance of wrinkles and fine lines. This is likely due to its antioxidant properties; Squalene is able to prevent free radical damage that causes the breakdown of collagen and elastin. It has also been known to relieve symptoms related to eczema and psoriasis. The only problem is that our bodies cannot produce Squalene in high quantities so it may be necessary to add pure Squalene (olive derived) if needed.

Squalene (olive derived) supplies skin with intense concentrations of natural vitamins C and B to strengthen and firm skin while boosting the skin's moisture retention ability, making the skin soft and dewy, increasing skin's resistance to environmental factors.

Squalene (olive derived) applied topically

Tests have shown that Squalene (olive derived) can be absorbed effectively into the skin and as a result, it's well suited for topical application. Formulations that include the ingredient can provide moisture and hydration to the skin whilst also offering the benefits of potent antioxidants.

Squalene is derived from olives and is an intense protective hydrator designed to relieve the signs of ageing and pigmentation. Squalene (olive derived) serum is an ancient extract used to soothe skin irritations. Full of super antioxidant benefits, this nutritious serum helps achieve smooth, hydrated and repaired skin that visually improves the skin with this first application.

Squalene (olive derived) is 100% pure and natural concentrated extract, rich in antioxidants, vitamins and nutrients. Squalene (olive derived) serum fights the signs of ageing, improving tone and texture for more youthful looking skin. Squalene (olive derived) serum reinforces collagen and capillary walls to reduce the appearance of solar damage.

Who should use Squalene?

Squalene is great for use as a moisturiser or under a moisturiser for extra protection and nutrition, use at night as a super enriched night treatment or as moisture mask during clinical treatments.
